

REDEYE GUNNER PERFORMANCE EVALUATION SHEET

For use of this form, see FM 44-17(C); the proponent agency is TRADOC.

Name _____ Date _____		Sheet _____ of _____			
Organization _____ Go/No-Go _____		Date _____			
Item <i>A</i>	PERFORMANCE STEP <i>B</i>		Crew Memb <i>C</i>	Score	
	GUNNER'S ACTIONS	EVALUATOR'S ACTIONS		<i>D</i>	<i>E</i>
1	Prepare the THT and begin searching for target.	Have the gunner prepare the THT and begin searching for the target. Observe the gunner to determine that the THT is properly prepared.			
2	Detect the target, assume a proper stance, point the THT at the target and oversight.	Observe how the gunner oversights and handles the THT.			
3	Begin to track and range the target. Activate the THT when the target is within the activate zone.	Determine the maximum activate range. Observe the target and listen for the operation of the safety and actuator device. After the gunner activates, tell him the class (I, II, or III) of the aircraft and say, HOSTILE, ENGAGE.			
4	Uncage as soon as a steady infrared radiation tone <u>and</u> the engagement order are received.	Listen for change in tone and/or click of uncaging switch.			
5	Superelevate and lead the target, using the proper lead reticle.	After the completion of the engagement, observe the performance indicator. (See item 6.)			
6	Fire at the target within the engagement zone.	Listen for the beep. Observe that the target is within the engagement zone. Observe the performance indicator to verify successful performance.			
7	Remove the power source immediately after completion of the engagement.	Observe that the gunner removes the power source in a timely manner.			
Evaluator's Name/Unit _____			Performance Time Seconds _____		
Legend TC = Tank Commander, D = Driver, L = Leader, G = Gunner		Notes: 1. Standards. Successfully engage 80 percent of five hostile aircraft. 2. For a no-go, record the item number under the run number		Status <input type="checkbox"/> Go <input type="checkbox"/> No-Go
